ASCC Regional Conference
“The Importance of Communication in the Design & Construction Process”

REGISTRATION FORM

April 3 & 4, 2013
Westin Gaslamp Quarter
San Diego, California

Wednesday Evening

Presentation and Preview Tour of San Diego Central Library Project
Presented by Turner Construction and Morley Construction
with special guest speakers Rob W. Quigley, FAIA and Jean M. Libby, P.E.

Thursday

Kevin MacDonald
Beton Consulting Engineers LLC, Prior Lake, MN
“Moving From Prescriptive to Performance-Based Specifications for Cast-In-Place Concrete”

Peter Ruttura
Ruttura & Sons Const. Co., Inc., West Babylon, NY
“The Pre-Construction Conference: Key to a Successful Project”

Name: ________________________ Company Name: ________________________
Address: ______________________ City: ___________ State: _____ Zip: ________
Telephone: _____________________ Email: _________________________________

- Full Registration – $120 (includes dinner, tour and speaker on Wednesday, April 3 and sessions on
  Thursday, April 4, breakfast and lunch)
- Wednesday Only – $50 (dinner and tour of San Diego Central Library project)
- Thursday Only – $90 (includes sessions on Thursday, April 4, breakfast and lunch)

Enclosed is my check for $________. Make checks payable to American Society of Concrete Contractors, 2025 S.
Brentwood Blvd., Ste. 105, St. Louis, MO 63144. Registration deadline is Monday, March 18, 2013.

Credit Card # (M/C, Visa, or AMEX) ____________________________ Exp. Date: ______
Name on Card __________________________________________________________
Signature __________________________________________________________________

Cancellation Policy: All cancellations are subject to a processing fee. Cancellations must be made no later than
Friday, March 22, 2013 to receive a refund. No shows will be charged full registration fee. For more information
call (866) 788-2722.

Hotel Reservations: Westin Gaslamp Quarter
Call (888) 627-8563 for a special room rate of $185/single. Mention ASCC.

(Schedule on reverse side)
Schedule

Wednesday, April 3

Location: 330 Park Blvd, San Diego, CA 92101 (about 10-minute walk from Westin Gaslamp)

Parking: Please use “Padres P-1” parking structure north of J St. between 10th and 11th or metered street parking. (see attached map)

Required Attire: Please wear closed toe, flat soled shoes (no heeled shoes greater than one inch please)
(hard hats, safety vests, and safety gasses will be provided to all attendees at the event)

Sign-in: 4:30-5:00 p.m.
Guided Tours: 5:00-6:30 p.m. (First tour begins at 5:00 p.m., last tour begins at 5:45 p.m.)
BBQ Dinner: 5:45-7:00 p.m.
Presentation: 7:00-7:30 p.m.

Presentation and Preview Tour of San Diego Central Library Project
Winner of the 2013 ASCC Decorative Concrete Awards “WOW! Award” for Best Overall Project

Presented by Turner Construction and Morley Construction with special guest speakers Rob W. Quigley, FAIA and Jean M. Libby, P.E.

When the San Diego New Central Library opens its doors in 2013 it will be a landmark project for both the City of San Diego and the project design and construction teams alike. The architectural concrete project presents multiple unique challenges architecturally and structurally. Custom cast-in-place concrete design elements include moment-frame columns up to 7 feet thick and over 60 feet tall, nearly 350,000 square feet of architectural exposed waffle slabs, a 46 ft tall x 70 ft wide exposed structural Concrete Gravity Arch in the Library’s main lobby, custom roof structures and more.

The project encloses 504,000 gross square feet on its nine above-ground floors, with 500-person penthouse-level community room, Children’s Library, Teen, Homework, and Adult Literacy Service Centers, reader seating for 1,200 persons, 407 computer stations, 22 wifi-enabled study rooms, gallery & exhibition spaces, adjacent 350 seat community auditorium, and café. Beneath the Library is a 250-car parking garage on two levels. The project targets a LEED Silver certification.

Read more about this project by visiting “forconstructionpros.com” and enter search words “Morley Architectural”

Special thanks to event sponsors

Schedule

Thursday, April 4

Location: Westin Gaslamp Quarter

7:30 a.m.    Continental Breakfast

8:00 – 8:30 a.m.    Welcome and About ASCC

8:30 – 11:30 a.m.    “Moving From Prescriptive to Performance-Based Specifications for Cast-In-Place Concrete”
Kevin MacDonald, Beton Consulting Engineers LLC

Specifications for ready mixed concrete have not evolved at the pace of other innovations in the concrete industry. For the most part, specifications today still have prescriptive provisions such as the types and quantities of the mixture ingredients, limits on cementitious materials, water-cement ratios, aggregate grading, etc. The general premise is that “if a problem occurred on a previous job, I will write a more detailed spec for the next job to solve my problem”. This is the historical basis for prescriptive specifications and not necessarily appropriate for the broad requirements and challenges for concrete construction today. This problem is compounded when the specification calls for prescriptive and performance criteria that conflict. The ready mixed concrete producer, who is most familiar with the product and its ingredients, should be responsible for designing and modifying the mixture for the performance, with input from the contractor on issues affecting constructability. MacDonald will address the P2P movement, the progress made to date, and what roadblocks remain to a more widespread adoption of this initiative.

11:30 a.m.  –

12:30 p.m.    Lunch

1:00 – 3:00 p.m.    “The Pre-Construction Conference: Key to a Successful Project”
Peter Ruttura, Ruttura & Sons Const. Co., Inc., West Babylon, NY

The first ingredient in all successful projects is a well-orchestrated pre-construction conference. A thorough discussion between the design professionals, contractors, the owner and other key players sets the stage for clear communication and better understanding throughout the life of the job. Discussing potential problems before work is underway is not only smart but can result in significant savings. Mr. Ruttura will outline the primary components of the pre-construction conference and provide invaluable insight on the concrete contractor’s role in this important process.
